EverLift[®]

Submucosal Lifting Agent

THE LIFT YOU'VE BEEN WAITING FOR

EverLift™

Submucosal Lifting Agent

INDICATION FOR USE

EverLift Submucosal Lifting Agent is indicated for use in gastrointestinal endoscopic procedures for submucosal lift of polyps, adenomas, early-stage cancers, or other gastrointestinal lesions prior to excision with a snare or other appropriate endoscopic device.

SUPERIOR CUSHION

CELLULOSE BASED & HYPERTONIC

EverLift is Cellulose based and able to stay in place longer because it does not get absorbed as fast as other lifting agents. It does not get absorbed as fast, because:

EverLift provides margin delineation with darker color.

Other Lifting Agents

EverLift

- EverLift is specially formulated with water retaining properties to prevent rapid absorption by the body.

- EverLift is hypertonic, meaning our formulation has a slower rate of absorption because of osmotic resistance.

EverLift holds a 2mm lift for 60 minutes.

THE LIFT

you've been waiting for.

CONVENIENTLY PACKAGED

PRE-MIXED WITH METHYLENE BLUE

Methylene blue is used to highlight the lesion perimeter and aid in: increased occurrence of en bloc resection rates, reduced occurrence of residual lesion and incomplete resections, improved identification of muscle injury to help avoid missed perforations.

REQUIRES NO PRE-PREP

Convenient zero-prep pre-filled syringes attach directly to any endoscopic injection needle's luer-lock connection.

COST EFFECTIVE

Use only what you need without throwing out what you paid for.

EverLift is reimbursable!
Visit our reimbursement guide at www.gi-supply.com.

First submucosal lifting agent available in a 5 mL and 10 mL option!

GI Supply has been the manufacturer of the leading endoscopic tattoos, Spot® and Spot® Ex, for 20 years and has been used in more than 5 million cases.

GI Supply continues to expand its submucosal injection offering with innovative yet affordable devices to make your job easier. Founded by a gastroenterologist, we have your practice's best interests in mind.
