

ONETRAC™

Single-Use Cordless Retractor with Integrated LED Light Source

obp
simple, bright ideas.™

ONETRAC is a single-use, cordless surgical retractor with integrated LED light source and smoke evacuation channel.

This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the surgical setting by making reusable devices and fiber-optic light cables obsolete.

Illumination and smoke evacuation in the depths of a surgical pocket can be met within seconds – no assembly, additional parts/components, or fiber-optic cables required.

PRODUCT FEATURES

- Disposable, single-use device reduces risk of cross-contamination
- On/off switch to preserve and maximize duration of peak illumination strength
- Integrated cordless LED light source produces no damaging heat and will provide peak power for 90 minutes
- Integrated smoke evacuation channel
- Revolutionary reinforced nylon material provides exceptional strength and rigidity
- Angled tip with blunt distal end to maximize tissue adherence
- Lightweight for added comfort and ease of use

TIRED OF EXPENSIVE LIGHTED RETRACTOR SYSTEMS?

Today's lighted retractor systems cost thousands of dollars with hundreds more in recurring disposables and/or reprocessing costs.

Each **ONETRAC** comes ready for use with everything needed to successfully retract soft tissue and illuminate a surgical pocket or cavity, all at a fraction of the cost of other lighted retractor systems. No assembly, additional parts/components, or fiber-optic cables are required.
