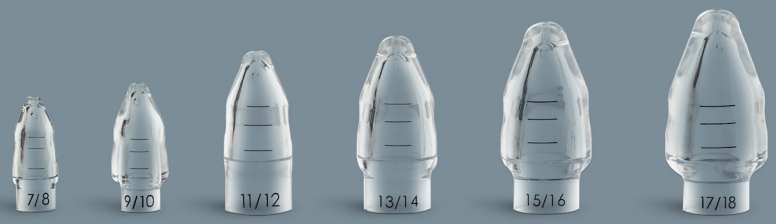
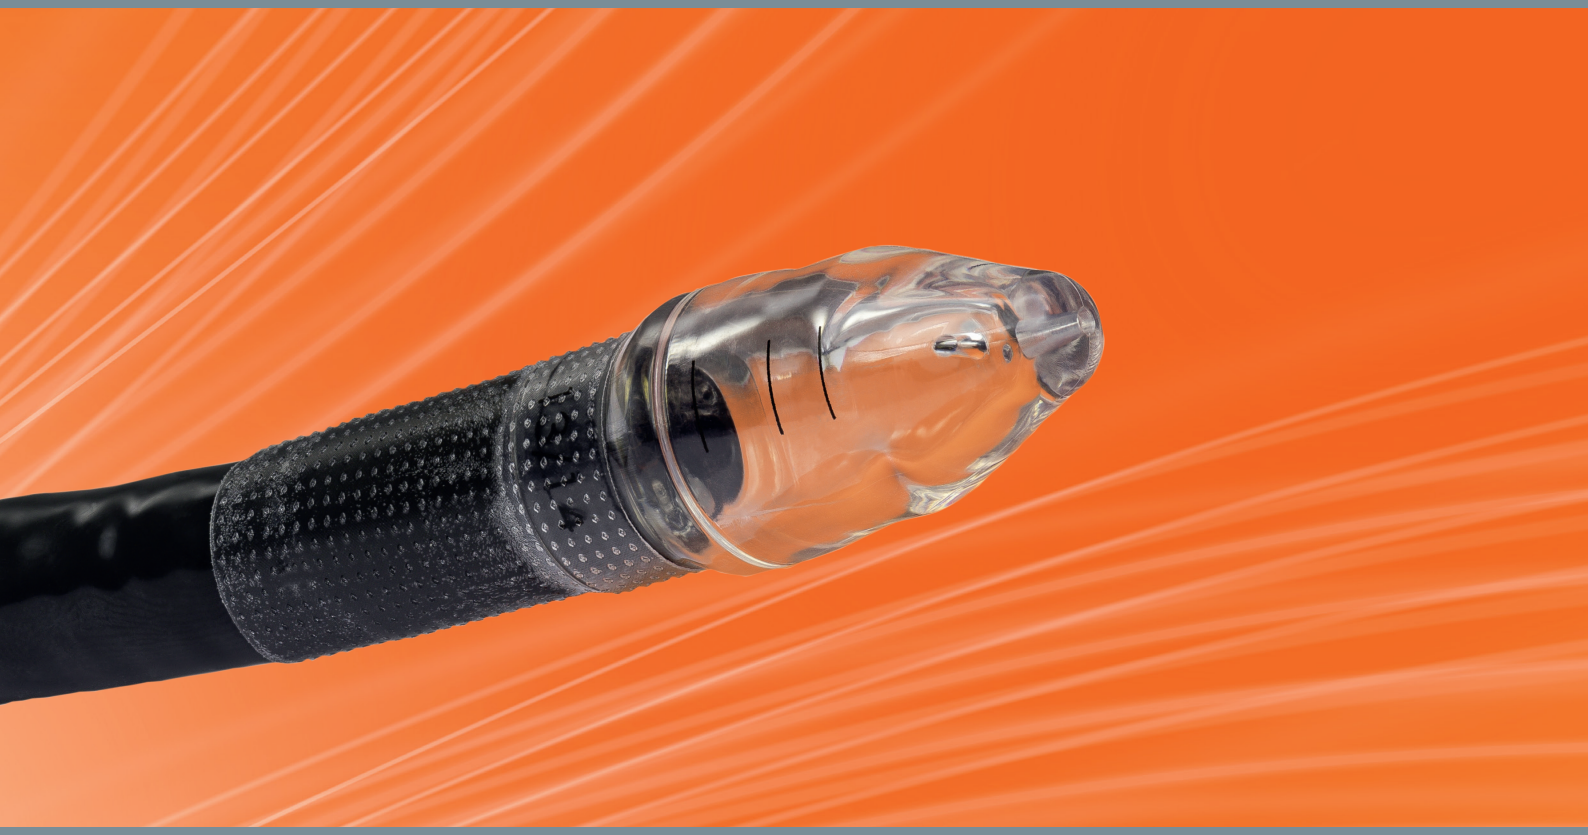
New Generation



BougieCap

For the bougienage of stenoses in the upper gastrointestinal tract

- Direct visual control for precise dilation
- Simple and effective bougienage with fewer instrument changes
- Up to 99% less waste compared to conventional dilation methods[1]



BOUGIE CAP

ovesco

BougieCap

For controlled and effective dilation of stenoses and strictures in the upper gastrointestinal tract.

The BougieCap enables direct visual control during the bougienage procedure. Thanks to its tapered design, stenoses and strictures can be very carefully and precisely dilated in millimetre increments, thereby avoiding overstretching.

The attached transparent cap enables direct evaluation of the dilation. Moreover, the procedure time is reduced due to fewer instrument changes.

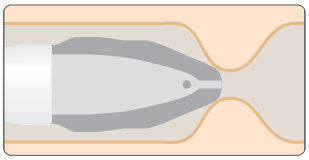
The two holes at the distal end of the cap allow for insufflation, suction and flushing. One central hole at the tip enables the BougieCap to be used with a guide wire (max. 1 mm/0.038 in).

Available versions

BougieCap	7/8	9/10	11/12	13/14	15/16	17/18
Ref. no.	400.31.02	400.31.03	400.32.01	400.32.02	400.32.03	400.32.04
Endoscope diameter [mm]	5.4 – 5.9		9.4 – 9.9			

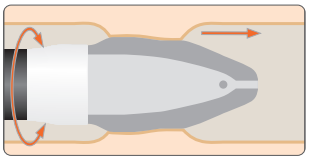
Use

Esophageal stenosis

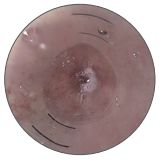


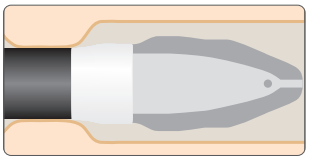
Guide the endoscope with the attached BougieCap until just before the stenosis.

[2]



Carefully push the BougieCap up to the first dilation plateau using gentle rotations.
Then, if required, continue pushing until it reaches the second plateau.





Successful passage.

Ovesco Endoscopy AG is a medical device company specialising in the fields of flexible endoscopy, endoluminal surgery and telemetric diagnostics. The company develops, manufactures and markets innovative products for the detection and treatment of gastrointestinal disease. Ovesco products are synonymous with efficacy and efficient application.
